

# OXICLEAN FERRO

Rust stain remover for marble

- ✓ pH neutral.
- ✓ Suitable for polished surfaces.
- ✓ Gel presentation.
- ✓ Immediate action.
- ✓ Ready to use.

## Description

Oxiclean Ferro is a ready to use non-acid rust remover, specially developed to **remove rust stains from all types of mineral surfaces** in a quick and easy way.

It is not based on acids and has a **neutral pH**, so Oxiclean Ferro can be used on delicate and polished mineral surfaces **without affecting their gloss**.

Its **high concentration** allows to eliminate **a large amount of rust** using a minimum product dose, **optimizing costs and storage**.

Oxiclean Ferro has an excellent penetration capacity, so it is also effective in removing **surface rust** in materials such as **marble, cement, terrazzo or hydraulic tiles**.

Also, its low viscosity gel presentation allows its localized application, optimizing the cleaning process and product consumption.

## Application Areas

Oxiclean Ferro is suitable to be applied on all types of mineral surfaces, such as: marble, granite, natural stone, agglomerates, porcelain stoneware, ceramic, clay, cement, sandstone, limestone, etc.

Rust stain remover for marble

## Physical-Chemical Characteristics

| APPEARANCE                                         | DENSITY           | pH         | SOLUBILITY IN WATER |
|----------------------------------------------------|-------------------|------------|---------------------|
| Colourless viscous clear liquid, distinctive odour | 1.075 ± 0.01 Kg/L | 7.35 ± 0.5 | Totally soluble     |

## Mode of Application

Oxiclean Ferro is supplied ready to use, so it must be used as supplied.

- 1- Initially moisten the surface to be cleaned with water.
- 2- Then apply Oxiclean ferro with its applicator on the rust stain. Oxiclean ferro acquires a purple tonality when it begins to act.
- 3- Then leave it on for a maximum of 5 minutes, rubbing if necessary.
- 4- Remove the product with the help of a microfibre cloth.
- 5- Finally, rinse with plenty of water, repeating the procedure in case of persistent stains.

## Formato

Containers of 125 ml and 0.5 L

## Recommendations

Oxiclean ferro has been tested on a wide variety of mineral surfaces yielding positive data regarding its effectiveness, however, it is strongly recommended to perform a preliminary test on a non-visible area to verify the compatibility of the surface with the product.

To remove rust stains on Carrara type and veined white marble, it is recommended not to let the product on for more than 3 minutes. If this time is exceeded, the surface may become slightly coloured. The colour acquired by the surface disappears after a few days.
